

BEM10 ELECTROMAGNET Holding Power OFF (Energise to release)

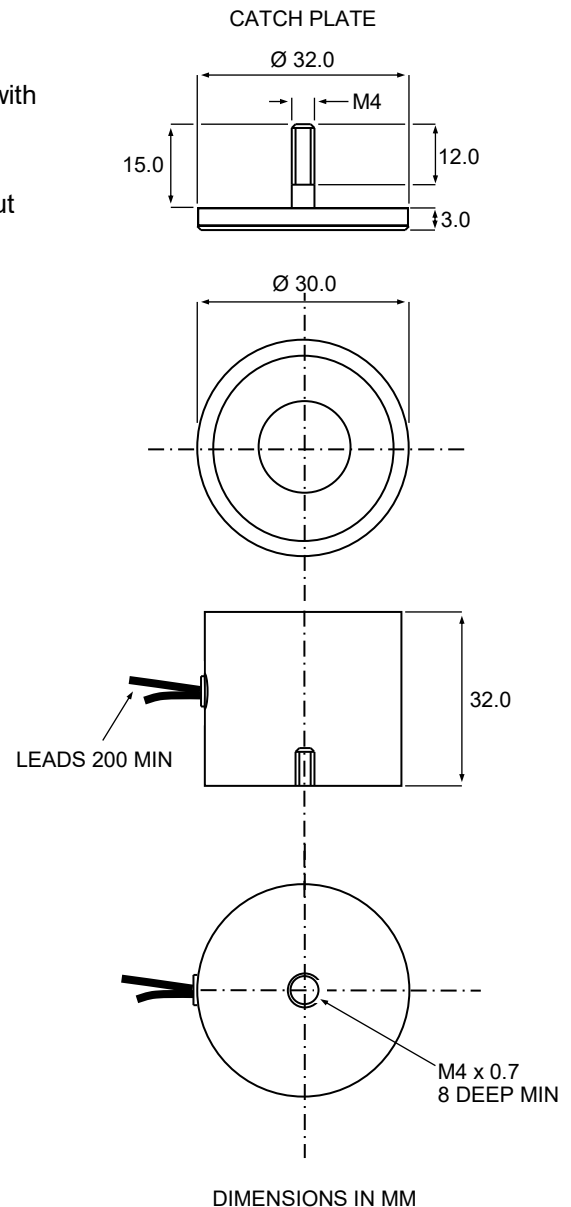

This magnet exerts a holding force POWER OFF, of approximately 12 Kgf perpendicular to the steel catch plate with which it is in contact.

The catch plate is connected to the body magnetically without voltage and therefore without power consumption.

The body is released from the catch plate by powering (electrical pulse) to cancel the magnetic field of the magnet.

Standard Voltage: **24V DC**
Voltage range: **12V - 110V DC**
Power consumption - **3.5 Watts**
Temperature Class B
Supply: **DC**
Protection rating - **IP40**
Finish - **Zinc Passivate**
Weight - **150g**

Supplied with catch plate

We reserve the right to alter or amend designs without prior notice.
